

A personal note from our Executive Director and her Commitment to Recovery

What we know for sure is that alcohol and drug addicts that actually work the twelve-step program rarely relapse. We also know that without an alcohol and drug free living environment most people have found that early recovery is next to impossible. Still others have found that without structure and/or support early recovery can be overwhelmingly difficult.

Making A Way Housing provides the best possible chance of early recovery from alcohol and drug addiction by monitoring our resident's twelve-step recovery through our in house management support teams while providing a safe, supportive and structured living environment.

By ourselves we are nothing. We are only as good as the people that God puts in our lives. Credit for our high level of success goes to the twelve-step program, committed residents, our kind referral sources and many helping friends. Without a man named Rodney B. who had a vision; Making A Way Housing would not exist.

Our growth is a result of loyalty, teamwork, and striving to do the next right thing. Without loyalty little can be accomplished. However, with trust many of our dreams become a reality. Teamwork, of course, is where common people achieve uncommon results. The next right thing builds a house of stone rather than a house of cards that will fall with the first wind.

Rodney B. taught me to stay on the action committee let God take care of the result committee and not give up five minutes before the miracle happens. Our programs returns former substance abusers to society as fully functional, drug and alcohol free individuals, with new values and attitudes and the skills they need to start rich and rewarding new lives.

As an old timer once said, "you can't change the world but you can make a difference!"

Thank you for your interest in Making A Way Housing and we look forward to a wonderful and exciting future in Recovery together!

Elizabeth M. Thompson

Executive Director
